

Oddział Chirurgii Dziecięcej współorganizuje Symposium EN

SIOP RTSG Surgical Subcommittee Meeting

& Symposium on Paediatric Surgical Oncology - Wrocław, 19 - 20th of April 2018

Wrocław, November 8th, 2017

Dear Friends and Colleges,

Members of the Surgical Subcommittee

of the SIOP Renal Tumours Study Group

The last annual meeting of the SIOP RTSG in Palma di Mallorca was an intensive event in all meanings. Like the whole SIOP RTSG, our subcommittee is also growing and approximately 30 surgeons were present in the room. During our surgical part some new ideas and new obligations were discussed. Several Colleges asked also the questions related to their cases. Finally, the idea to organise purely surgical meeting to respond all those needs was warmly accepted by members.

In 6 months, the section of Oncology of Polish Society of Paediatric Surgeons will organise (Wrocław, Poland, 19-21st of April, 2018) symposium addressed to paediatric surgical oncology. As the Chairman of both this Section and the Surgical Subcommittee of the SIOP RTSG I would be more than happy if we could meet at that occasion. Half a day would be reserved for the official working-meeting of the SIOP RTSG Surgical Subcommittee. We will have enough time to discuss all the surgical issues "in depth". Of course, we will not be alone - Chair of the SIOP RTSG, prof. Norbert Graf promised to be with us and help us from the paediatric side. I would suggest an open formula of our meeting to allow the participation to Foreign and Polish surgeons interested in our field but not involved in our subcommittee. We need to re-discuss the question of consultations, access to RTSG web and maybe our section there. There are also some on-going projects (anatomical vs. non-anatomical NSS in terms of complications and completeness, IVC - an effort to build the recommendations specific for Wilms tumour with the IVC thrombus). The program will be flexible and open to Your suggestions. We plan also some attraction: Dutch Colleges proposed to show us certain technical novelty they developed in Princess Maxima to better visualise local anatomy when considering NSS. - Having the regular imaging (MRI or CT) uploaded to "the device", You will be able to see in the virtual 3D space the relationships (and not only!) between the kidney, renal vessels and the tumour. This way we believe to gain an interesting supportive tool to better assess the possibility of NSS.

Our RTSG half-a-day will be followed by the symposium on surgical oncology. I would like to invite You to participate also in this part and I will be delighted having some submissions from Your side and help in chairing the sessions.

Prof. J. Godzinski MD PhD

jgodzin@wp.pl

Chair of the Surgical Subcommittee of the SIOP RTSG (Renal Tumours Study Group)

Head of Dept. of Paed. Surgery, Marciniak Hospital,

Fieldorfa 2, 54-049 Wrocław, Poland

+48-71-3064389 (secr), +48-71-3064415 (direct)

Head of Dept. of Paediatric Traumatology and Emergency Medicine,

Wrocław Medical University

+48-71-3286045 (secr)

Few words on Wrocław in the end of April:

Weather

- No snow
- Young leaves on trees and quite a lot of early flowers in grass
- Temperature 15-18 C, short spring rains possible

City

- Several museums at low price
- Many many interesting restaurants in the medieval old town – the heart of the night-life in Wrocław
- Still safe country and safe city. Friendly people badly speaking foreign languages, but younger generation which speaks English better. No problem with English in the restaurants, hotels, travel offices and airports.
- The touristic program and nice networking events are planned.

How to reach us

- Airport – close to the city (30 min by TAXI for +/- 25 Euro), direct air connections to Munich, Frankfurt, London and several other cities. You can also come via Warsaw (another 45 min flight). Our capital city is connected to all EU countries, USA, Canada, Russia and far east countries.

Preliminary program (no fee!!, the organisers count on the RTSG team to co-chair the sessions and act as the faculty, submission of the abstracts is more than welcome)

Venue: Dolnośląska Izba Lekarska

50-077 Wrocław, ul. Kazimierza Wielkiego 45, POLAND

- **Venue is located very close to the Old Town and the Market Place, 5 - 10 min. walking distance from majority of the suggested Hotels (see separate attachment)**

Thursday, April 19th

13:00 – 18:00: arrival, registration, snacks and coffee

14:00 – 18:00 SIOP RTSG Surgical Subcommittee Meeting (open)

19:00: **Welcome reception** in old town

Friday, April 20th

8:00 - 11:00 registration, coffee and snacks

9:00 - 9.30 Welcome addresses

9.30 -10.00 **Invited lecture 1** "An overview of the international studies on WT"

10:00-10.30 **Invited lecture 2** "Surgery for renal tumours of childhood: questions to be answered"

10:30-11:00 coffee

11:00-12:30 **Session I:** "The surgery for renal tumours"

12:30 - 13:30 **Session II:** "The gonadal tumours and fertility"

13:30-14:15 lunch

14:15 - 15:30 **chees and wine:**

Presentation of the Virtual 3D system for planning NSS (Princess Maxima team) - everybody can try!

15:30 - 17:00 **Session III:** "The surgery for soft tissue sarcomas, bone tumours and neuroblastoma"

17:00 - 17:15 coffee

17:15-18:30 **Session IV** Presentation and discussion of challenging cases (not limited to WT!)

19:30 - 23:00 **Dinner** - old town

Saturday, 21st of April

9:00 - 13:00 Guided tour of the city

14:00 - 16:00 "guided" lunch: "The European Crossroad: Discover the Delicious Polish Dishes, maybe You already know them from elsewhere?"
